ANOTHER CASE OF THE "UNLOADED" GUN

LITTLE WILLIAM SNOW ACCIDENTALLY SHOT BY HIS BROTHER IN CASEY—LIVE NEWS FROM WEST END.

Hustonsville, July 20. The old story of not knowing the pistol was loaded came to light again Wednesday afternoon when William Snow, the 16-year-old son of a prominent Casey county citizen, was shot and probably fatally wounded by his 13-year-old brother, Allen.

The boys were examining an old pistol which had been laid away for some time, when Allen accidentally touched the trigger and the weapon was discharged. The ball entered the younger boy's cheek and he fell unconscious. Physicians were hastily summoned, but at last accounts had been unable to locate the bullet and held out but little hope for the lad's recovery. Allen Snow is said to be nearly distracted over the unfortunate affair.

SQUIRE M'KECHNIE SAFELY HOME AGAIN

HAS BEEN QUITE ILL IN BONNIE SCOTLAND BUT IS BETTER —"LOG" OF HIS VOYAGE.

Squire and Mrs. James McKechnie have returned from their trip to Scotland, the birthplace and former home of the Squire, which he had not seen for forty years. The squire had a severe spell of illness while across the water and is about ready to agree that there is no place on earth like the old Kentucky home. He is still considerably "under the weather", but improving nicely. He sent the I. J., his "log" of the voyage, coming across the Atlantic, which tells of his trip across as follows:

HOMEWARD SOUND After a delay of 24 hours at this place owing to the seamen's strike, we bid Liverpool adieu for a while at least. After a sojourn of 33 days in Scotland, we are at last I, very reluctantly bring our tour to a close.

I had intended keeping our friends in Lincoln county, and the foreign lands acquainted with our travels because the Interior Journal goes to all ends of the earth but owing to illness I could not get around much and when I was getting around I didn't feel like writing. However, I have kept my promise better than some friends who promised to keep us informed of what was going on in Lincoln county, and the rest of the globe. The guilty ones know who I meant.

Monday Morning July 3rd. On board steamship Arabia. A beautiful morning until in sight of land. Our ship called at Queenstown Ireland this A. M., at 8 o'clock to take on passengers and mail for the United States, were delayed two hours doing this. I can't say yet what is the size of our family; will report after the roll is called.

This ship is not to be compared with the Mauretania, the ship we came here on, but she is reported to be a good one. I can tell more about it when we see how she behaves herself on the briny deep.

Monday July 3rd. At 2 P. M., we ran upon and of course passed them without any provocation. 13 British war vessels. I just thought of my friend Caswell Stanley had been there with his and Uncle Sam's fighting tools, we could have some fun. We are now passing Fastnet Light House and in a short we will be out of sight of land until Sunday or Monday the 9th or 10th inst. We are having a beautiful day, the Irish Sea where we are now is as smooth as Dick Bratton's fish pond. Of course there are no such fish in it. At least if there is there is no one telling it. Mrs. McKechnie is well and upon deck with her knitting. I will call it, if it is not the right name she can correct it when she sees you.

4 o'clock P. M.—Land has disappeared, nothing in sight now only sea and sky, and our ship, our wireless telegrapher however just had a message from the steamship Franconia, and a little later we could see her in the distance.

Musie by the ship's orchestra in the dining saloon at 8 P. M., which furnishes for the day.

Tuesday Morning July 4th. The first thing which attracted our attention this morning was they had turned the clock back 74 minutes so we were up too soon for breakfast; went upon the upper deck to get the fresh air and wait for the breakfast gong.

Several vacant seats at the breakfast table owing to sea sickness mostly among the children. So far I myself have improved since I got aboard ship Sunday noon. This would indicate that I had missed my calling and ought to be a sailor instead of a Squire.

This being the Fourth of July we are doing some celebrating. We have the dining saloon decorated with the stars and stripes, the Union Jack, and the flag of poor, down-trodden Ireland, which consists of a solid green with a figure in the center holding a harp. Among the passengers there are those who would die for their choice; as for me I love them all, but do not like some of their forms of government. I might say the United States has the strongest following in this crowd. Our supper tonight is the following menu:

Potage Americaine, Halibut, Lexington, Fillets of duckling, Long Island, Ribs of beef, Howe, Philadelphia Capon, John Hancock, Patna rice, Carrots and turnips, fried egg plant, boiled and browned potatoes, Cold ox tongue, York ham, Bunker Hill Pudding, Apricots

Carolina, Ice cream and wafers, Cheese, Desert, Coffee.

This is an American dinner. I can't tell you whether or not it was good. Mrs. McK. sampled it all and she will likely write and tell you about it at her leisure.

Wednesday Morning, July 5. At 6 o'clock A. M., I went upon deck and found there was a strong head wind blowing, and a rough sea coming. The sailors called it a choppy sea but that don't make me change its name. I call it rough and getting rougher.

Noon, still a rough sea, and foggy; fog whistle blowing every minute, or so. A good many absentees at dinner table Mrs. McK. in the absent list.

The ship's orchestra will play in the second cabin dining room at 3 P. M. Orchestra on hand at the appointed time and gave a fine selection, of English, Irish and Scotch pieces, among the Scotch selections were Annie Laura and Auld Lang Syne. The day has been rough throughout. Concert again tonight at 8 P. M.

Thursday July 6. A rough, wet morning and the fog horn is being sounded; it continues rough until noon, fog lifts occasionally and bids fair to be nice weather soon.

A beautiful evening the most of the sick ones on hand for supper. Mrs. McK. is about over her sea sickness again and able to sample the good eating that is furnished. A Whist party for 8 o'clock tonight and a Stag party at 10 P. M., is on the program. I will not take them in, so I will not be able to report them. We have four colored men passengers on board they are Hindoos, from Calcutta in the East Indies. They are well educated very reserved and have been to Calcutta on a visit. They are in business in Atlantic City, N. J., and are fond of the United States.

Friday Morning July 7. Beautiful morning, a little foggy at times which calls for the fog horn. Beautiful evening and not much news. They seem to get wire news dispatches but they do not give them to the passengers as the steamer Mauretania did as we went to England. There has been five accidents on board since we left Liverpool Sunday, five different ones have had their limbs broken. Some of them slid and fell on deck others fell down stairs, and I hear it reported too much booze in some cases.

We are just a little over half way across the pond now, which means something like a ten days passage, while we went across in five days just the difference between a fast and slow ship, and of course the longer they take, the more liable you are to storms, and other calamities.

Saturday Morning, July 8th. A nice, calm sea running; everybody on hand for breakfast. I believe Mrs. McK. is well again and took up her knitting again and is working for home. I am not much well but keep going and on the look-out for something new, but this is a poor place to get news, just sky, sea and ship, which gives plenty of opportunity for thought and study, but as for me, I don't know where to begin, so will not undertake to picture the immensity of God's handiwork. Just come and see for yourselves.

Sunday Morning, July 9th. A beautiful morning after a night's tussle with a choppy sea. Everybody seems well and happy. Divine services at 10:30 A. M., held by the Church of England people. They just sing, play the lute, pray and read. They prayed for the King of England, the president of the United States and the Emperor of Germany and all the royal family and left the poor population to take care of themselves. They did not worry the congregation as it was all over in 30 minutes. They don't pray loud and long when the sea is calm, and everything running right. What is the difference between life on the sea and on land?

We are promised a sight of land in about 24 hours, which will be the night of the 10th. I believe everybody is ready for the sight as everyone is tired of looking at sea and sky alone for nine days.

Monday, July 10. Another beautiful morning; some fog again about 8 o'clock but soon cleared up and every one seems to be enjoying life on the ocean wave. The bulletin at 12 noon says we have 227 miles to travel to put us in the port of New York, so if the Lord is willing we will get there tomorrow at noon. It seems like a life time since we boarded this ship. She is seemingly a very good ship, but too slow to suit me. We expect to see Nantucket light house tonight by 8 o'clock. Will finish this epistle to

AEROPLANE FLIGHTS BY BIRD MEN AT LEXINGTON FAIR

Flights Will Begin on Tuesday and Several Will be Made by J. A. D. McCurdy Each Day Over Lexington

Any of the foreign monoplanes. With it McCurdy can easily attain seventy-five miles an hour. With such a machine he will give demonstrations at the Blue Grass fair that will be not only thrilling to the spectator, but of very great educational value as well.

Beginning Tuesday, August 8th, the second day of the fair, Mr. McCurdy will make several flights each day. He will attain an altitude of more than a mile and will remain in the air from thirty to forty minutes. On August 8th he will also make a flight from the grounds of the Blue Grass Fair association in Lexington to Winchester, the county seat of Clark county, eighteen miles distant. There he will alight for a few minutes to carry a communication from the officials of the Blue Grass fair to the mayor of Winchester, and when an answer is received, will come immediately back to the Blue Grass fair grounds. The round trip, including the stop at Winchester, will be made in less than an hour and a half. This trip will not only prove the speed of the McCurdy machine, but it will also show the practical uses to which modern air craft of the best type can be put.

The management of the Blue Grass fair anticipates that these aeroplane flights alone will be considered by the people of Central Kentucky well worth the price of admission and will draw to the grounds record-breaking crowds. The flights will be arranged at such hours throughout the day that they can be witnessed by all. Those who come from a distance and are compelled to take early afternoon trains will have the opportunity to see these flights before being compelled to leave.

The fastest and most powerful of all American aeroplanes directed by the most skillful of American aviators is the attraction that will be offered during the week of the Blue Grass fair, August 7th to 12th.
